Basic parameters

- Suction output up to 11,000 m³/h.
- Vacuum up to 90%.
- Proven cyclone air filtration system.
- Low wetting and clogging of the air filters due to cyclone filtration.
- Easy emptying and maintenance of air filtration.
- Intuitive control SINZ Control panel with Telematics.
- Tank capacity up to 12 m³.
- Stainless steel or steel tank.
- Possibility of ADR or Ex certification.
- Radio remote control.
- Water pump 150 Bar, 90 l/min for rinsing the machine and minor work.
- Reel for 40 m pressure hose diameter 1/2 "and water gun.
- Rear bumper with hydraulic folding.
- Storage spaces on both sides of the truck.
- Vibrator for better unloading of adhesive materials

Optional items

- Telescopic suction arm rotates 180 ° with an inclination of up to 40 ° up and 30 ° down and a reach of 4 m.
- Bulk material blowing system.
- Hi-lift system for emptying into big-bags and containers.
- High-capacity compressor for powering pneumatic tools.
- Bigger water pump.
- TATRA chassis with all-wheel drive for difficult terrain and heavy loads.

Certification available

Available in unique Hybrid variant

Suitable for daily cleaning in heavy industry where the electrical drive saves money and environment. Diesel drive and high suction power is also available to be used in emergency or during downtime maintenance.

High suction output

Original cyclone air filtration

TATRA terrain chassis
